

Finding a Registered Service Provider

State law requires service providers have the proper credentials to service sewage treatment system components. As a result, the make and model of the aerator must be determined, as well as the year installed. Please follow the steps below to determine an appropriate service provider.

1. Determine your system's Type, and Age by using one or more of the following options:

- a. Located on a sticker on your unit's control box.
- b. Listed in your Owner's Manual.
- c. Located on your septic permit.
- d. Visit www.starkhealth.org for the online "*Septic and Well Records*" to find a copy of your permit.

2. Is your system a NPDES permitted system?

- a. If your septic was installed prior to 2007, then "No" your system is not a NPDES. You may search for your System's Type under the "*1. ALL SYSTEMS INSTALLED PRE-2007 OR POST 2007 ON-LOT SYSTEMS*" to find an appropriate service provider.
- b. If your system was installed in 2007 or after 2007, but goes from the aerator into a soil based leaching component such as a leach field, leach trench, leach well, spray field, or drip field, then "No" your system is not a NPDES. You may search for your System's Type under the "*1. ALL SYSTEMS INSTALLED PRE-2007 OR POST 2007 ON-LOT SYSTEMS*" to find an appropriate service provider.
- c. If your septic was installed in or after 2007 and discharges into a ditch, culvert, creek, etc., then your system holds an Ohio EPA permit. You may search for your System's Type under the "*2. POST 2007 NPDES OFF-LOT SYSTEMS*" to find an appropriate service provider.

3. Contact the Service Provider Company to obtain a contract. The service provider will inform the Stark County Health Department that you are now under contract.

Unit specifics can be found on the unit's label, manual, permit or www.starkcountyohio.gov/public-health/environmental

<u>BUSINESS NAME</u>	<u>1. ALL SYSTEMS INSTALLED PRE-2007 OR POST 2007 ON-LOT SYSTEMS</u>	<u>2. POST 2007 NPDES OFF-LOT SYSTEMS</u>
